Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Bartolucci (3,974,916). Bartolucci discloses a method of improving personal hygiene through personally identifying beverages in a container having a major exposed surface comprising an array of normally closed indicia (30) representing and identifying penetrable apertures (20-26) disposed on the major surface and marking (20) a selected one of the apertures correlating with identity of a user. The phrase “penetrable apertures” as claimed is considered equivalent to a closed aperture and the closed apertures of Bartolucci are inherently capable of penetrating.
